

INFORMATION

Waterways are a big part of our environment. They are our rivers, creeks, lakes and oceans. But our waterways need saving.

Pollution is overwhelming even the smallest streams. Even the smallest things like raking leaves into the gutter have a huge effect.

The government has taken notice of this and put up fines. But that isn't enough. We need YOUR help.

This brochure features 6 easy ways to help. These are to pick up your dog's poo, wash your car on the grass, put your rubbish in the bin, put lawn clippings and raked leaves in bags to throw out, plant trees along the riverbanks and pick up three pieces of rubbish in the bin each time you go to the beach.

Our water is in YOUR hands.

You CAN Be Fined!

Not picking up dog poo: \$235.60

Littering: Up to \$250

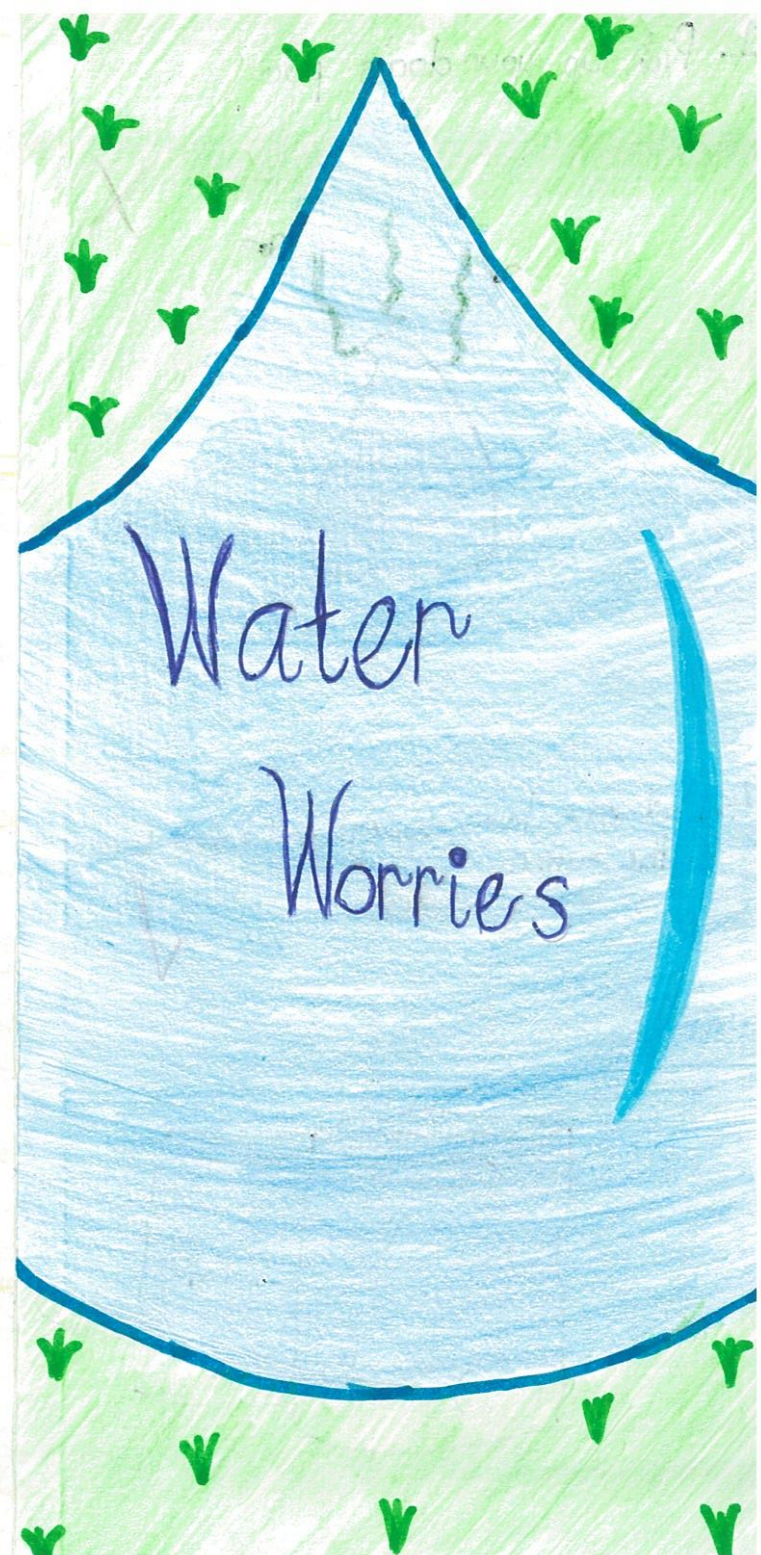

Removing Trees: \$5,000
