

Managing Our Mid-Coast Marvels

Enviro-Stories Program

The **Managing Our Mid-Coast Marvels Enviro-Stories Program** provides students with the opportunity to learn about some of the precious animals, communities and habitats of the Mid-Coast region of NSW.

The Mid-Coast region has a large mix of environments – from the mountains to the coast. This has led to a wide array of plants and animals calling the area home. Unfortunately, many of the regions plants and animals have become vulnerable and their survival is under threat.

This program gives students the opportunity to research/ learn about a threatened species – our Mid-Coast Marvels. Students will create a storybook to help others learn about these marvellous species and the work being done to secure their survival.

What is Enviro-Stories?

Enviro-Stories involves students learning about their local area and passing this knowledge on to others through storytelling.

It gives kids a voice... a voice for their creativity, a voice for their concerns about the world around them, a voice for their community.

Enviro-Stories is funded by sponsors who enable regional projects to be FREE for schools. Managing Our Mid-Coast Marvels program is supported by Hunter Local Land Services.
